SUMMARY

B. Tech Computer Science with specialization in (AI & Data Science) (Pursuing) with hands-on experience in full-stack development, cloud architecture, and intelligent systems. Passionate about building real-world applications at the intersection of machine learning, RAG pipelines, and 3D web development.

TECHNICAL SIMULATIONS

Data Analytics Virtual Experience | Deloitte Australia (Forage) June 2026

- Analyzed forensic data and built an interactive Tableau dashboard to surface key business trends.
- Used Excel to classify and segment datasets, translating raw data into actionable conclusions.

Solutions Architecture Virtual Experience | AWS APAC (Forage) Dec 2025

- Designed a scalable AWS Elastic Beanstalk hosting architecture for a client experiencing high-growth and slow response times.
- Delivered a plain-language architecture document covering system design and cost models.

Front-End Software Engineering Virtual Experience | Skyscanner (Forage) May 2026

- Built an interactive travel date picker web page using React and Skyscanner's open-source Backpack UI library.
- Executed automated test coverage to validate application customization and seamless rendering.

PROJECTS

Fizz & Co – 3D Product Storytelling Web App

- What: Browser-based 3D product showcase built with Next.js, Three.js, and React Three Fiber.
- Does: Renders real-time 3D visuals with scroll-driven cinematic transitions for brand product pages.
- Impact: Deployed live at fizz-co.vercel.app; gained GitHub traction showcasing advanced WebGL skills.

Personal AI Agent

- What: A personal assistant chatbot built with React and LLM APIs to handle everyday queries and tasks.
- Does: Processes natural language inputs, fetches responses via API, and displays them in a clean conversational UI.
- Impact: Demonstrates React skills, API integration, and async/await patterns in a real-world AI use case.

AI News Summarizer

- What: A web app that fetches latest news articles and summarizes them using LLM APIs.
- Does: Pulls articles from news sources, sends content to an LLM for summarization, and displays concise digests.
- Impact: Reduces information overload by delivering quick, readable summaries — showcasing practical NLP application.

EDUCATION

B.Tech – Computer Science (AI & Data Science)

GLA University
Mathura, India

SKILLS

Languages & Frameworks

- Python, Java, JavaScript, TypeScript, React, Next.js, Three.js, React Three Fiber, HTML/CSS

AI / Data Science

- LangChain, Prompt Engineering, LLMs

Cloud & Tools

- AWS (Elastic Beanstalk), Git & GitHub, Vercel, Google Colab

AWARDS & CERTIFICATIONS

Google Data Analytics Certificate

Google | Add your date

Skyscanner Front-End Engineering

Forage | May 2026

AWS Solutions Architecture

Forage | Dec 2025

Deloitte Data Analytics

Forage | June 2026
